Legal Disclaimer

It is required that you read this legal disclaimer section carefully. If you have any doubts, get advice from legal, financial, taxation, or other competent law practitioners. All of the information provided here is meant to be incomplete and should never be construed as a part of different contractual arrangements.

Our firm conviction is that the information provided in this white paper is accurate and up to date and that all products, services, technical architecture, token distribution, and company timelines are correct and up to date. Furthermore, these materials may have changed without notice and can never be considered a signatory agreement of advice.

No Advice:

This white paper does not obligate anybody to sign a contract or make a legally enforceable commitment to contribute. This white paper also does not constitute any form or part of any opinion that can be construed as advice, or that can be used to sell or solicit any offer by Trillions to purchase our token, nor shall it be interpreted as a part of any effect that can be used in the formation of a contract or an investment decision.

Legal Disclaimer

Compliance with Tax Obligations:

Website users are entirely responsible for determining what if any, taxes apply to their transactions. The Website's owners or authors are not responsible for choosing which taxes apply to commerce.

Limitation of Liability:

Onschain shall not be held liable for any loss or harm from using this Website's material, including written material, links to third-party sites, data, quotations, charts, and buy/sell signals. Please remember the dangers and expenses of trading assets on the financial markets (digital or otherwise). ICOs, in particular, are one of the riskiest investing options. There's a chance you'll lose your entire investment.

Investment Risks:

Trading cryptocurrencies have a high level of risk and is not suited for all investors. You should carefully evaluate your investing goals, level of expertise, and risk appetite before trading cryptocurrencies, tokens, or any other digital asset.

Onschain

The world of finance is changing rapidly, and two of the most exciting technological developments in recent years have been blockchain and artificial intelligence (AI). While blockchain has introduced a new way to securely store and transfer digital assets, AI has revolutionized how we analyze data and make decisions.

At the intersection of these two technologies lies Onschain, a new cryptocurrency project that aims to harness the power of AI and blockchain to create a faster, more secure, and more efficient system for transactions and data analysis. By leveraging the decentralized nature of blockchain technology and the data processing capabilities of AI, Onschain is poised to revolutionize the world of finance, enabling seamless, low-cost transactions and real-time data analysis.

To expand the community, Onschain will concentrate on several different factions and aim to bring them together. Onschain will be subject to varying rules based on the section they belong to (their rarity). Join our community to discover more about Onschain, which offers art and multiple passive income opportunities for everyone involved in this journey.

Our Mission

The mission of Onchain is to combine the power of blockchain technology and artificial intelligence to create a new, decentralized financial system that is faster, more efficient, and more secure than traditional economic systems. At its core, Onchain is designed to provide a seamless, low-cost way for people to conduct transactions and exchange value while enabling real-time data analysis to help individuals and businesses make better decisions.

By leveraging the power of blockchain technology, Onchain can provide a decentralized system that eliminates the need for intermediaries, reduces the risk of fraud, and ensures the security of transactions. Meanwhile, by incorporating artificial intelligence into its design, Onchain can provide real-time data analysis to help individuals and businesses make better decisions and stay ahead of the curve in an ever-changing financial landscape.

At Onchain, the future of finance is decentralized, and blockchain technology and artificial intelligence will play a key role in making this vision a reality. Our mission is to build a system accessible to everyone, regardless of their location, background, or financial status, and that empowers individuals and businesses to take control of their financial future.

Holding of ONS

As a less resource-intensive solution to mining, holding is used. It entails storing funds in a cryptocurrency wallet to finance a blockchain network's protection and operations. Holding is the process of securing cryptocurrencies to obtain incentives. Investors can hold their cryptocurrency by validating and holding ONS tokens on the exchange to maximize the rewards. The more the investors hold on to the exchange and invest in ONS tokens, the more they will be rewarded.

- 20% of the Onchain will be accumulated and invested in third-party top DAOs. We intend to make our project invest in bit DAOs, the biggest DAOs.
- Last but not least, ONS holders will have full commercial usage rights over their NFTs, which can be held, sold, or transferred at their own will.

Holders can earn incentives by holding and controlling their digital wealth. Passive income for the beneficiary is the reward of holding.

Holding Benefits

It is advantageous in cryptocurrency as it generates rewards by holding the coin on any exchange and generating passive income. When an investor has a token and stakes the pool, it is the easiest method in a decentralized world. There is sufficient energy consumption and stumpy probabilities of risks while staking than any crypto mining. Onchain coins are here for you.

Passive Income:

Stakeholders earn incentives by holding and controlling their digital wealth. Passive income for the beneficiary is the reward of staking.

More Cost Effective:

Proof-of-stake blockchains are always inexpensive and less energy-consuming platforms with no particular and expensive hardware requirements. Unlike proof of work chains, PoS is more cost-effective and eco-friendly. So, the stakes can earn more passive income using the Smart Liquidity Onchain.

Holding Benefits

Scalability:

In the Blockchain world, scalability is a concept that is often used. It refers to a computational process's potential to be used or generated in various ways. Proof of stake protocols, as Onchain shows, higher transaction outputs and lower fees make for greater scalability.

Echo Friendlier:

As Proof of stake, blockchains are fewer energy consumers and more environmentally friendly. Thus, they have a lower carbon footprint and have little or no environmental effects.

Highly Secured with the help of Smart Contract:

The biggest issue in the modern world is security and privacy, and We provide a swift and stable portal backed by the Onchain contract, making us superior to others. Onchain contract offers users a highly secure and fast platform for staking crypto.

Building the Future

Onchain is shaping the blockchain landscape with cutting-edge technology and innovations. We transform business processes by offering secure, fast, and scalable solutions. Step into the digital economy of the future with Onchain!

Mobile Payment Makes Easy:

Industry dominance, established tech stack, tools, languages, standards, enterprise adoption.

Big Data Insights:

You can trade & invest toekn oluta nobis est eligendi optio cumque nihil impedit quo minus id quod maxime placeat magni dolores.

Security Your Money:

We protect user data and emo enim ipsam voluptatem quia voluptas sitaut odit aut fugit, sed quia consequur magni dolores aspernatur.

Why Choose ONS?

Open for Global Participants:

An added benefit of ONS coin use is that it's completely decentralized so that p2p trading can be done freely across borders. Technology will facilitate a financial revolution that will leave everyone more financially connected, empowered, and enabled. Onchain has no frame, so these can be used anywhere you are located globally. This also has a significant effect on international payment fees.

The Efficiency of Payment Transactions:

Standard transfers and foreign purchases typically involve fees and exchange costs. Since ONS transactions have no intermediary institutions or government involvement, the prices of transacting are kept very low. Additionally, any transfer happens very quickly, eliminating the inconvenience of typical authorization requirements and wait periods.

Why Choose ONS?

Fast and Secure:

ONS is different because of its potential features of security, privacy, transparency, blockchain technology, Farming, lending, P2P trading, and the NFTs marketplace.

We created a platform using artificial intelligence to connect people through transparency.

Strong Security:

We are built and maintained to the highest security practices to protect our users and their funds. We provide private and secure proprietary technology applications (apps) and decentralized exchange with its encrypted communication platform.

Free from Corporate and Government Interference:

Our coin transactions have no intermediary institutions or government involvement, and the costs of transacting are kept very low. Additionally, any transfer happens quickly, eliminating the Inconvenience of specific authorization and waiting period requirements.

Token Details

Contract Adress: [0x57FC32015c09eF510584648b89BfE42642CD2d76](#)
Token Name-----Onschain
Symbol-----ONS
Total Supply-----21,000,000 ONS
Network-----BEP-20
Decimal-----18
Minimum Purchase-----100 USD
No. of Tokens for Initial Distirubition-----8,400,000 ONS

Onschain Pre-Sale has three stages. Each Pre-Sale Round period is 15 days. After Pre-Sale, ICO Progress will start. ICO progress will have ten stages. Each ICO Round period is 15 days. After that, Private Sale will start. Private Sale has three stages. Each Round period is 15 days.

After the sales process is complete, there will be distribution and exchange listing.

ONS Swap

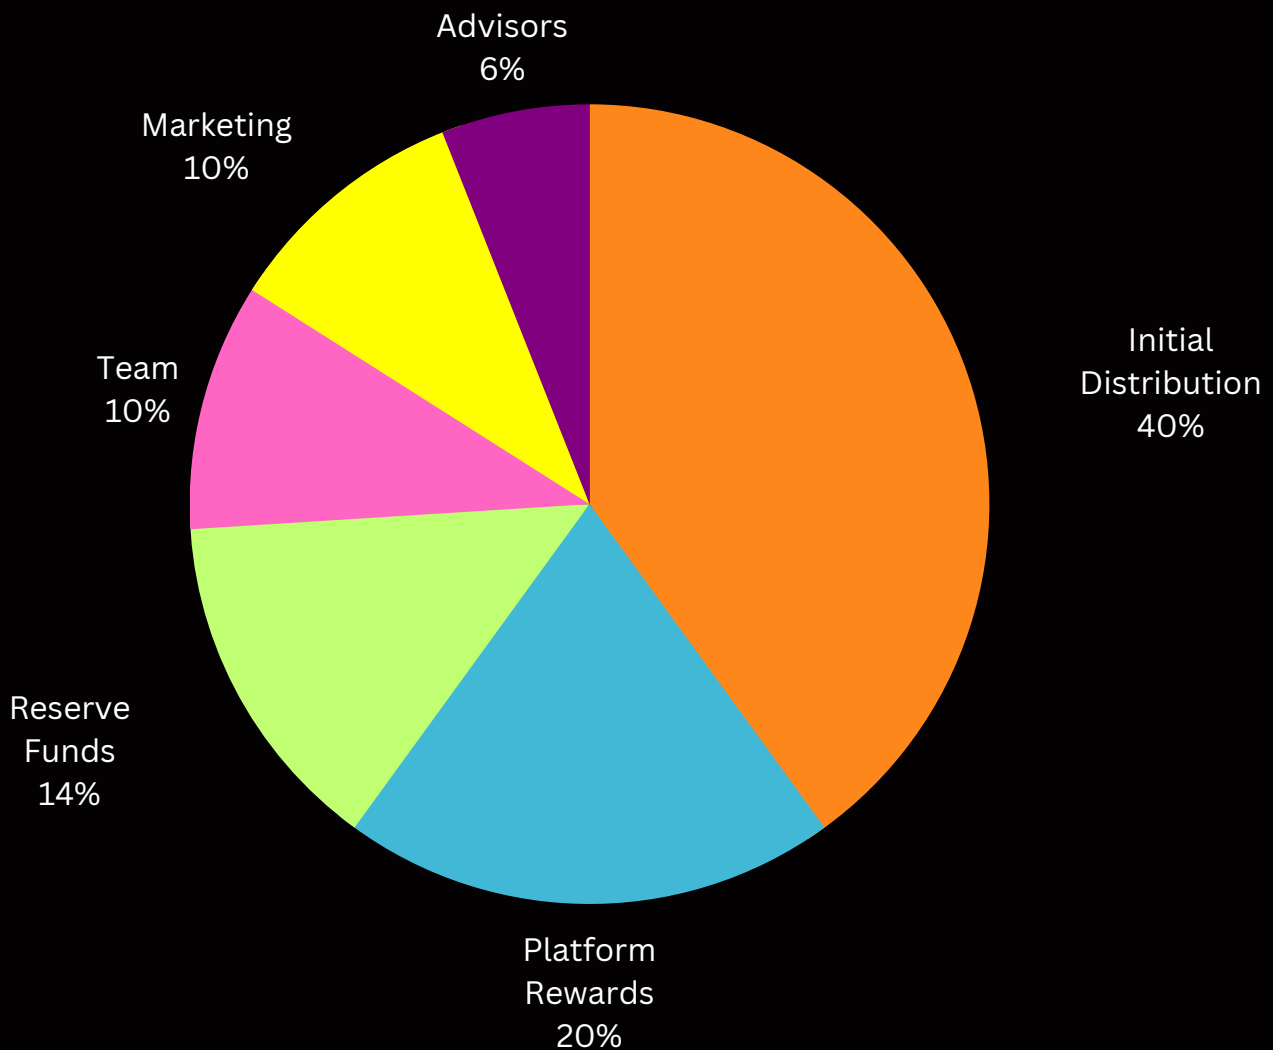

A decentralized trading platform on Onchain will be added, satisfying the need for fully decentralized payments. Innovative global business connects Onchain making it easy and convenient to secure and process transactions, breaking any user-touchable space close to the future world of the dominant cryptocurrency; ONS Swap guarantees outstanding speed token processing and low transaction fees so that the community can easily connect. Onchain is an easy, fast, and secure exchange creating an entirely new ecosystem, built to facilitate a crypto derivative market where traders have access to various trading and investment instruments, enabling a highly liberating, strategic, low-risk, and seamless trading experience in a truly decentralized way. Onchain is going to launch its decentralized exchange (ONS Swap).

You can exchange crypto with ONS Swap in your Private Key Wallet or Trading Account. Exchanging from your Private Key Wallet provides you with the benefits of a non-custodial, on-chain trade settlement. Swapping from your Trading Account provides faster payment and no network fees.

ONS Tokenomics

Onschain's Tokenomics is configured by Chat-GPT-4 for longevity and has been carefully thought through by the team. It enables it to accumulate value for all token holders in the ecosystem. The structure allows the platform to adapt to new opportunities and similar challenges, strongly emphasizing that it drives community growth.
